PROFESSIONAL SUMMARY

Product-minded engineer who has independently designed, built, and shipped 2 full-stack AI products end-to-end (0 to 1) and is currently building a 3rd as founder. Shipped 15+ APIs, 7+ product modules, and cut content creation time by 80% on EchoGrow; built and deployed a full voice-AI assistant (VoxAide) integrating 3+ Google Cloud AI services. Comfortable owning a product from scoping to shipping across web, backend, and desktop surfaces, and iterating using data (A/B testing drove 30% higher engagement in a prior role). Technical foundation in React/Next.js, Python, Java/Spring MVC, SQL, and cloud AI platforms (Google Vertex AI, Firebase). Seeking a Product Intern role to bring hands-on 0-to-1 building experience and a strong bias for shipping.

EDUCATION

B.Tech, Computer Science and Engineering | VIT Bhopal University, India - CGPA: 8.53 Sep 2023 – Present
Class XII (CBSE) - 92.8% | **Class X (CBSE) - 90.5%** | Sachdeva Millennius School, India 2019 – 2022

WORK EXPERIENCE

Software Developer Intern | Coding Club India (2.7 Lakh+ Followers on LinkedIn) Jul 2025 – May 2026

- Crafted responsive front-end interfaces using HTML, CSS, JavaScript, and Bootstrap for multi-device compatibility.
- Implemented backend modules using Java and Spring MVC to enable scalable feature implementation.
- Constructed and deployed RESTful APIs with optimized SQL queries, improving data retrieval performance.
- Executed A/B testing on multiple UI flows, resulting in 30% higher engagement and 25% drop in bounce.

PROJECTS

EchoGrow - AI-Powered Business Growth Platform | Solo Builder - Live at echogrow-three.vercel.app

Next.js, TypeScript, Google Vertex AI (Gemini), PostgreSQL, Prisma ORM, Tailwind CSS, Vercel

- Engineered an AI-powered business growth platform featuring 7+ modules and 10+ reusable components using Next.js and TypeScript.
- Reduced content creation time by 80% using AI automation.
- Developed 15+ RESTful APIs with Prisma ORM and PostgreSQL to support scalable AI-powered workflows.
- Integrated Google Vertex AI (Gemini) for personalized ads and reels script generation.

VoxAide AI - Voice-Enabled Customer Service Assistant | Independent Builder - Live at voxaide.web.app

React, TypeScript, Python (Flask), Firebase, Google Cloud Vertex AI (Gemini), Twilio

- Created a voice-enabled AI customer support assistant, automating support conversations and cutting manual response handling for businesses.
- Shipped 7+ product features, including AI voice support, Twilio call integration, Firebase Authentication, and Firestore-backed data storage.
- Architected a 6-layer full-stack system (frontend, backend, database, auth, hosting, AI engine) using React, Flask, Firebase, and Google Cloud Vertex AI (Gemini).
- Integrated 3 Google Cloud AI services (Vertex AI/Gemini, Text-to-Speech) plus Twilio to power real-time conversational voice support over live phone calls.
- Deployed the product across 2 platforms (Firebase Hosting + Render), taking it from concept to a live, working demo.

Tradexa (BackTest Tracker) - AI Trading Journal | Solo Founder - In Progress

Chrome Extension (JS), Python FastAPI, Electron + React, Next.js, SQLite

- Founded and am independently building a 4-part product suite (Chrome extension, backend, desktop app, marketing site), currently in active development, pre-launch.
- Developed a Chrome extension that auto-captures 5+ trade data points (entry price, stop-loss, take-profit, direction, symbol) directly from TradingView via hotkey-triggered DOM parsing.
- Engineered a FastAPI backend with local SQLite storage and an OCR fallback pipeline for automated trade logging.
- Designing an Electron + React desktop dashboard surfacing 3 key trading metrics: win rate, profit factor, and max drawdown.
- Launched a 4-page marketing website (Next.js, Tailwind, Framer Motion) covering home, pricing, docs, and contact, ahead of the product's beta rollout.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS

Frontend / Frameworks: React, Next.js, Spring MVC, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB, Firebase Firestore, SQLite

Cloud & AI: Google Vertex AI (Gemini), Firebase, AWS (S3, EC2), Google Cloud

Product & Analytics: A/B Testing, Feature Scoping, User-Facing Documentation, Data Analytics (Matplotlib, Pandas)

Tools: Git, Postman, Jupyter, VS Code, IntelliJ

AWARDS & CERTIFICATIONS

- Solved 300+ algorithmic problems across LeetCode, CodeChef, HackerRank, InterviewBit, and SPOJ.
- Certifications: Java Full Stack Development with Spring MVC — Coding Club India.
- Google IT Support Certificate — Google Career Certificates.
- Ericsson Edge Academia Program — Ericsson (selected among top 700 candidates worldwide).
